

Post-Mortem Summary - Phishing Incident (May 15, 2026)

A phishing email targeting the Finance department was quarantined within 30 minutes of detection. No users clicked the malicious link or entered credentials. Key improvements identified include automated email quarantine based on threat intelligence, faster user reporting through phishing simulations, and the creation of a dedicated phishing response runbook. These improvements aim to reduce future detection-to-containment time to under 15 minutes.

Key Metrics:

- Detection Time: 15 minutes
- Containment Time: 30 minutes
- User Click Rate: 0%
- Remediation Cost: Low
